CONTENTS OF VOLUME III

Distribution of the Means Divided by the Standard Deviations of Samples from Non-Homogeneous Populations 1

G. A. Baker

A Statistical Approach to Mathematical Formulation of Demand-Supply-Price Relationships 10

Robert W. Burgess

The Distributions of the Precision Constant and Its Square in Samples of from a Normal Population 20

H. M. Feldman

A Postulate for Observations 32

R. Henderson

A Short Method for Solving for a Co-efficient of Multiple Correlation 40

Paul Horst

A Short Method and Tables for the Calculation of the Average and Standard Deviation of Logarithmic Distribution 45

Thomas N. Jenkins

On Symmetric Functions of More than One Variable and of Frequency Functions 56

A. L. O'Toole, National Research Fellow

A Generalized Error Function 64

Albert Wertheimer

A Co-efficient of Linear Correlation Based on the Method of Least Squares and the Line of Best Fit 79

J. B. Coleman

A Study of the Distribution of Means Estimated from Small Samples by the Method of Maximum Likelihood for Pearson's Type II Curve 86

J. L. Carlson

CONTENTS OF VOLUME III—Continued

A New Theory of Depreciation of Physical Assets 108

Robert E. Moritz

The Simultaneous Distribution of Mean and Standard Deviation in Small Samples 126

Allen T. Craig

The Limits of a Measure of Skewness 141

Harold Hotelling and Leonard M. Solomons

The Theory of Probability from the Point of View of Admissible Numbers 143

Arthur H. Copeland

Relative Residuals Considered as Weighted Simple Residuals in the Application of the Method of Least Squares . . 157

Walter A. Hendricks, Junior Biologist, Bureau of Animal Industry, United States Department of Agriculture

Moments and Distributions of Estimates of Population Parameters from Fragmentary Samples 163

S. S. Wilks

On the Sampling Distribution of the Multiple Correlation Coefficient 196

S. S. Wilks

Curve Approximation by Means of Functions Analogous to the Hermite Polynomials 204

Herrick E. H. Greenleaf

Approximation and Graduation According to the Principle of Least Squares by Orthogonal Polynomials 257

Charles Jordan

Concerning the Limits of a Measure of Skewness 358

Raymond Garver

Trapezoidal Rule for Computing Seasonal Indices (Editorial) 361

Harry C. Carver
